

Active Transportation Improvements

Islington Avenue area | Newsletter #1 | September 2022

What improvements are being made?

The City of Vaughan is undertaking important municipal infrastructure improvements in your community, including new cycling facilities and streetlighting upgrades.

These improvements are part of the City's 2022 Pedestrian and Cycling Infrastructure Implementation Program. The construction of in-boulevard asphalt cycle tracks/multi-use paths and streetlight upgrades will further expand and enhance the connectivity of the City's active transportation network within the Woodbridge neighbourhood.

The project is currently in the design stage with construction anticipated to commence spring 2024. Construction work for this project will be coordinated alongside the watermain replacement project on Islington Avenue.

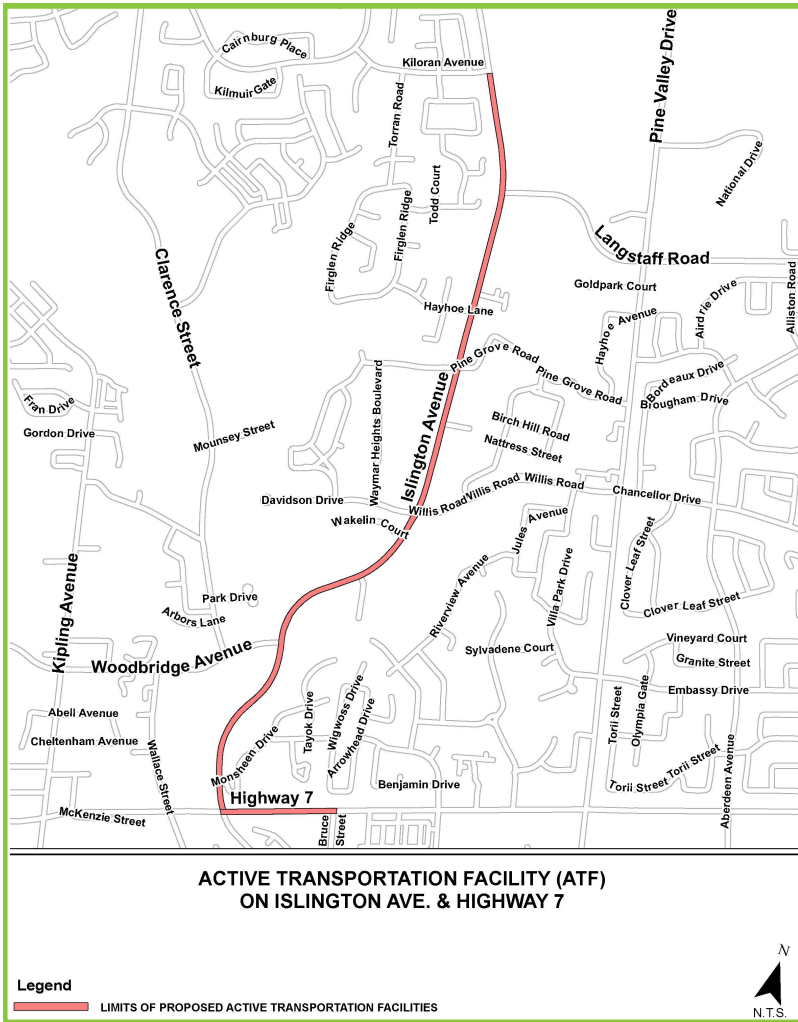

Pre-Construction Field Work | 2022

This year, City-retained engineering consultants will be conducting field investigation activities in the area, including topographic surveys, geotechnical boreholes and other field investigation work. The various underground utilities (i.e., gas, telephone and hydro) will be identified by coloured paint markings.

All roads will remain open to traffic while the field investigation work is being carried out, under the direction of the Infrastructure Delivery department.

Construction locations:

- Islington Avenue, from Kiloran Avenue to Highway 7
- Highway 7, from Islington Avenue to Bruce Street

Project Updates

Newsletter #2 will be issued upon completion of design and prior to construction to provide further details including approximate construction start and end dates.
