

Greening Vaughan Tips

Grape and tomato skins should be placed out for collection in the green bin. If a household needs to dispose of a large quantity of grape/tomato skins, they may place them in a large clear plastic bag solely dedicated for grape/tomato skins. Place this bag beside the green bin for collection. Remember, green bin materials set out for collection can not exceed 20.5 kg (45 lbs.).

Wooden grape crates are considered garbage. To ensure collection wooden crates should be broken down and bundled. Please remove all nails. Bundles can not exceed 20.5 kg (45 lbs.) in weight. Remember, each bundle of crates will count as an item toward Vaughan's 3 item garbage limit. **Do not stack crates together or fill crates with grape skins.**
