

# Watermain Improvements

Keele Street/Highway 7 area | Newsletter #3 | September 2021

## What improvements are being made?

The City of Vaughan is undertaking important municipal infrastructure improvements in the Keele Street and Highway 7 area, including watermain replacement and road restoration work. These enhancements support the City's continued commitment to ensuring long-term sustainability of municipal infrastructure.

The planned improvements also include new sidewalk and streetlighting on the west side of Keele Street, from Bowes Road to approximately 200 metres north, to interconnect the existing sidewalks.

Construction is expected to start later this month, with anticipated completion by summer 2022. Construction will stop during winter months and begin again in spring 2022.

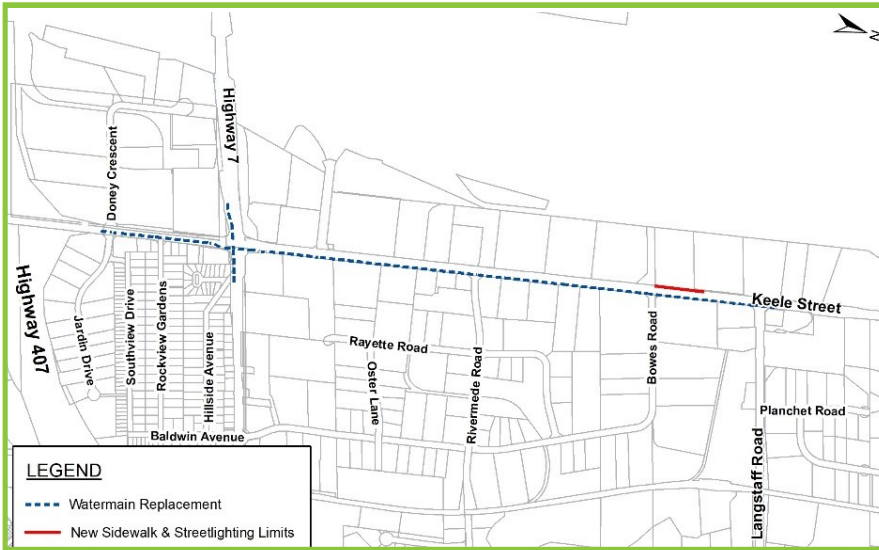

## Construction Scope

Construction will include replacement of existing watermains and road restoration, on Keele Street, from Jardin Drive (north of Highway 407 junction) to Langstaff Road and along Highway 7 within the Keele Street intersection, as identified in the areas of the blue dotted lines on the enclosed map.

Construction will begin at the southern end of Keele Street to north of Highway 7. In the spring, construction will resume from north of Highway 7 to Langstaff Road.

## Overnight Construction

To minimize the overall impacts of construction and duration of the project, components of the watermain installation will be staged and completed between 7 p.m. and 6 a.m. Night work for the watermain construction is expected to commence on Monday, Oct. 4, 2021. All construction will be carried out in compliance with the City's Noise By-law No. 062-2018.

**There will be disruptions to water service during construction.** To minimize impacts during typical business hours, the shutdowns will be scheduled during evening and overnight hours where required. Additional notices will be circulated at least 48 hours in advance to all impacted residents and businesses.
