

#### **4. Major Mackenzie Drive Pedestrian Stairs**

##### **Purpose:**

As a component of the Maple GO Station renovation completed in 2003, the Development Planning Department has concluded negotiations with GO Transit to design and construct a pedestrian stair connection on the east side of the railway overpass from Station Street to the north sidewalk along Major Mackenzie Drive, and to be paid by GO Transit. The stairs will be enhanced with decorative paving stones, railings, trash receptacles and light standards, that will be reminiscent of the historic Village of Maple.

This will formalize and make safe, the existing informal pedestrian route between Station Street and Major Mackenzie Drive that traverses a 7 metre high hill. Pedestrian and vehicular access to the station is only possible on the east side of the railway as at-grade track crossings are not provided east to west in the area. Vehicular access to the station is by way of Hill Street from Major Mackenzie Drive, however, there is no formal pedestrian route from Major Mackenzie Drive to the station currently.

##### **Timeframe**

Construction should commence early 2007.
