

1. Maple North Streetscape Masterplan

Purpose:

As the revitalization of the historic Village of Maple continues, the established community has begun to push beyond its traditional boundaries as far north as Teston Road along Keele Street. As a result, a streetscape masterplan is being developed for this area known as Maple North that will provide a continuation of the pedestrian-friendly and transit-supportive streetscape environment from the core of Maple to meet the needs of growing residential neighbourhoods and employment uses in Maple North. The Maple North Streetscape Masterplan envisions attractively paved sidewalks, street trees and furnishings such as benches, trash receptacles and decorative street lights that will continue on a variation of the heritage theme established within the Village of Maple core.

Timeframe

Masterplan will be completed by 2007
